

Track Day Update 16th August 2010-06-18

We thought it was time we should update you on the progress towards the 'Jewel In The Crown' of our Motorsports events this Summer. The Dulford Auto's castle Combe track day 16th August 2010.

We now only have one place left of our allocated slots. Cars confirmed include:

- 1) TVR 4.6 Chimaera
- 2) TVR Car 77 Tuscan Challenge race car
- 3) TVR 5.2 JE track spec Griffith
- 4) Subaru (TSTCC)
- 5) Honda S2000
- 6) TVR Sagaris
- 7) Ford GT40
- 8) TVR 5.0 Griffith
- 9) Subaru STI
- 10) TVR race prepared Griffith
- 11) TVR Tamora
- 12) TVR Sagaris
- 13) Westfield
- 14) TVR Griffith
- 15) TVR Tamora

You can probably tell that the circuit is our personal favourite (in the UK). The circuit offers us a chance to be a driving God for a day in our own cars. The circuit offers us a chance to push our skills to the limit for the day. The circuit layout is basically three straights and some twisty bits. This will give the novice tracker a chance to get to grips with a permanent race track layout and not forgetting the curbs. It will be possible, if you want to practice some high speed driving and braking. For those who have only been to airfield days this is your chance to put into practice all you have learnt on a high calibre proper race track.

The more experienced of you will savour this track as usual. Most of the experienced drivers will know Combe of old. This track is in my top 3 because it's fast, furious, demanding and technical with delicate car balance required to achieve a hot lap. This coupled with the high demands of Avon Rise into the infamous Quarry corner it's got it all.

We will be sharing the track along with some Lotus 7 cars, with like our group varying experience and abilities. The day is aimed at raising money for Leukaemia

and Cancer of the Blood Research. Any of our cars who want additional drivers or passengers will make a small donation at the track on the day. The day will be split with three groups, each having 20 minute sessions on track. If you could let us know which group is appropriate before this would help.

- A) Novice and inexperienced
- B) Have done track days before with moderate speed
- C) Track experienced

Please be honest as this will further your enjoyment on the day and make for a safer time

As usual for our track days we will have full technical support along with parts supply from Dulford TVR and TVRcarparts

The weather forecast is giving glorious sunshine throughout Wiltshire, with a slight south westerly breeze just taking the edge off highs of 28 and track temperatures of 33. Early morning mist will quickly burn off by 8.30 sign on giving way to a crisp sunny morning with temperatures rising steadily to a very pleasant 28 in the Saharan breeze. Due to the shameless pit area we will be setting up our pit garage offering shade, social and hand squeezed lemonade

I for one can't wait to shatter this ideal with the thunderous, earth shaking roar of my warp factor 10 John Eales V8 Griff

I will be in touch again nearer the date with final instructions

TVR A Glorious Thing

Perry
